LENT white paper

London Entrepreneurs Network Token (LENT) - Version 1.0 - October 2026

About London Entrepreneurs Network

London Entrepreneurs Network (LEN) is a business community and ecosystem that has been active since 2008. It connects startups, small and medium-sized businesses, investors and professionals through networking events, business shows, exhibitions and a free online platform where members can promote their products and services and message one another. LEN's stated mission is to support entrepreneurs of every background with exposure, connections and practical opportunities. LENT is a utility token created to support that member community.

Purpose and member use

LEN Exchange Token (LENT) is an optional settlement method for agreed Service/Product Exchange deals. Members use their existing LEN account, agree terms through the member channels, and choose either direct barter or a LENT payment. Direct barter remains available without using LENT. Using LENT alone settles a member exchange; USDT is not required at checkout.

After the recipient accepts a member payment request, the LENT amount is reserved in a separate ledger hold. Normal release is no earlier than 14 full days after documented completion, with an open dispute freezing release. This platform safeguard is not a statement that all UK business transactions have a statutory 14-day cancellation right. No early-release waiver is available.

Supply and allocation

The LENT contract fixes the supply at one billion tokens with six decimal places and no additional mint function. The distribution is shown below.

Allocation of 1,000,000,000 LENT - genesis structure

Wallet	Share	Tokens	Purpose	Release terms
Founder allocation	15%	150,000,000*	Founder & owner allocation	Locked on-chain: nothing before 25 Jan 2027, then linear release to 25 Jan 2028
Safe multisig	40%	400,000,000	Treasury & liquidity	2-of-2 multisig governance; no time lock
Community allocation	45%	450,000,000	Community rewards, SPX incentives, partners, development	Locked on-chain: nothing before 25 Jan 2027, then linear release to 25 Jan 2028; released to the Safe multisig
Total	**100%**	**1,000,000,000**	**Fixed supply - no additional mint function**	

The community allocation is held in a time-lock contract and is earmarked for community rewards, Service/Product Exchange incentives, partners and sponsors, and human development and audit contributors. When it vests, tokens are released only to the Safe multisig, which requires multiple signatories for any treasury or liquidity movement. *Of the founder allocation, 190,000 LENT is reserved as the initial liquidity-pool contribution and is not locked; the rest is held in the founder time-lock contract.

The founder allocation is distinct from the treasury and community pools. The AI assistant has no token allocation. Shareholders, prospective partners and sponsors have no automatic token entitlement under this allocation.

Contract and wallet addresses (BNB Smart Chain)

Item	Detail
Token contract	0x1Ca53AB509757A4FE134709Ee53BBcDA5D4a8A6d (verified on BscScan)
Name / symbol / decimals	London Entrepreneurs Network Token / LENT / 6
Founder wallet	0x86cA5C9cA402e7904A758E96d703b10E4B12bbd5
Safe multisig (treasury & liquidity)	0x89A8837e001D5847E4B391D051ff395bB326654E
Founder time-lock (beneficiary: Founder wallet)	0xc47444be7487874579ECfD202F8E6901B125C69c - 149,810,000 LENT, cliff ends 25 Jan 2027 00:00 UTC, fully released 25 Jan 2028 00:00 UTC
Community time-lock (beneficiary: Safe)	0xFd26Cd9E937b0BF0aB363585988422b437505099 - 450,000,000 LENT, same schedule
Liquidity-token lock (beneficiary: Safe)	0x166F7B637f5d9b5570f4c05B101Bfdc22Fc1CA32 - will hold the PancakeSwap liquidity tokens, locked until 25 Oct 2027 00:00 UTC

The time-lock contracts are immutable: the beneficiary cannot be changed, there is no early withdrawal and no administrator key. Anyone can check these addresses, schedules and balances independently on BscScan. The member utility records internal LENT balances and Service/Product payments; on-chain custody uses separately controlled wallets, verified reconciliation and secure key recovery.

Member payment costs and access

LEN charges no commission on member settlement. Internal ledger entries do not involve blockchain gas. No LENT is silently deducted from the recipient amount or a refund. The member utility is limited to eligible, verified members settling already-agreed Service/Product exchanges. Direct barter remains available.

Rights and risks

LENT is not a share, bank deposit, cash balance or promise of profits, and its value can change substantially. Product or service quality remains subject to the agreement between the members and the platform terms. Existing LEN activity and community links provide context, not token backing or a price guarantee.
